

NEW OFFICIAL PARTNER

"Don't Be The Next Ransomware Victim!"

Scott Hagizadegan, CEO
Shield IT Networks

We are proud to announce our new cybersecurity partnership with the California Society of Certified Public Accountants (CalCPA)

With over 20 years of industry expertise and a 100% uptime guarantee, our US-based security and support team is equipped to keep your CPA firm up and running, 24/7.

Why Should You Care?

- CPA Firms (US-based) are a top target for hackers ¹
- The frequency of data breaches is increasing ²
- New CCPA stiff fines ~\$2.5k - \$7.5k each violation not including potential lawsuit(s) ³
- Firms must follow strict requirements for cyber insurance coverage

According to the White House, one of the top threats we currently face is ransomware attacks on small to mid-sized businesses, resulting in their operations being completely halted. According to a recent FBI report, ransomware attacks have reached a frequency at the same national rate as auto accidents (every 11 seconds) and doubling that average for California businesses (every 5.5 seconds).⁴

Why Shield IT Networks?

Strength and resilience make Shield IT Networks the preferred provider of premium cybersecurity solutions for Southern California's CPA Firms.

Ranked in the Top 5% Cybersecurity MSPs Nationwide!

Ranked in the top 5% of cybersecurity MSPs nationwide, our next-generation cybersecurity and network resiliency solutions remain unmatched in the industry, protecting your firm and your clients. Cybersecurity Solutions Fit for CPA Firms

CPA firms are goldmines for hackers... The amount of private data your firm holds is a major cash grab for hackers and leaves you as a top contender for ransomware.

By implementing Shield IT Network's industry-leading cybersecurity solutions, your firm will stay protected 24/7, backed by an us-based security operations team. Keep your CPA firm, your clients' identities, and your reputation protected.

CYBERSECURITY SOLUTIONS INCLUDED FOR CALCPA MEMBERS:

This new partnership also includes some major perks for CalCPA members. Your firm is now eligible to receive over \$8,000 in cybersecurity benefits, complimentary to you as a part of your active CalCPA membership!

Network Assessment

Initial discovery appointment to complete a network performance analysis to better understand your current IT setup and determine surface issues. This step is required before a PEN Test.

Discount on IT Solutions

All active CalCPA members receive a 10% savings on all IT and cybersecurity solutions! A Network assessment and penetration test are required before this discount can be honored.

Cybersecurity Vulnerability Assessment (PEN Test)

This test uncovers any and all vulnerabilities, compromises, and weakened defenses. This test runs upwards of \$8,000 per analysis for non-members. A network assessment and verification of your active CalCPA membership are required before this test is performed.

\$8,000 RETAIL VALUE - INCLUDED FOR CALCPA MEMBERS

Getting Started Is Easy As 1-2-3

CPA firms are goldmines for hackers... The amount of private data your firm holds is a major cash grab for hackers and leaves you as a top contender for ransomware.

1. Schedule an initial high-level executive discovery call and network assessment
2. Run our full Penetration Test on your network to uncover all security vulnerabilities
3. Post-test meeting to review findings and your full health report with a list of remedies
